Form Letter to North Street Residents

Mattapoisett, MA 02739

Re: **North Street Sewer Replacement Project**

Dear Homeowner:

The Board of Water & Sewer Commissioners are herein advising you that construction on the above noted project should start during the week of May 2, 2011.

The project involves the replacement of the existing old sewer on North Street from the Water Street intersection to the area of 51 North Street. In addition, the project includes the replacement of existing sewer service connections from the new main in the street to the approximate street property line. As a result, there will be limited construction activity on landscaped portions of your property that are actually owned by the town.

Construction work will be sequenced so that only portions of North Street will be impacted at any given time. If all goes well, construction work within the paved road will be complete by the end of June 2011.

For your information, this construction project has been planned for a number of years to help reduce overall sewage flows in our community by eliminating infiltration and inflow sources that are known to exist in the old pipe.

Finally, as construction work proceeds, sections of North Street will be closed to the public to expedite construction progress. However, North Street will be open for emergency service and you will have access to your home with only minor delays during active construction hours. At the end of each construction day, North Street will be open for your use.

Thank you for your anticipated cooperation during the construction effort. We will make every effort to limit inconvenience to you as construction continues. If you have any questions on the project, call the Water & Sewer Department at 508-758-4161.

Sincerely,

William T. Nicholson
Water & Sewer Superintendent
