

2015

The Natural Resource Department performs a wide variety of programs throughout the year. Some of those duties include education pertaining to wildlife and domestic animals. Shellfish propagation, enhancement programs will continue throughout the year. We work on many projects that will benefit our Natural Resources. We also work closely with Fish and Wildlife authorities to help keep our wildlife safe and flourishing.

The Animal Control Officers for the town we will continue to educate the public with concerns about domestic animals. Leashed dogs are safe dogs. Picking up after your dog is a responsible act performed by the owner. Please obey the rules and regulations pertaining to your furry friend. Love them, leash them, and license them.

Thank you to all the continued support from all the towns department. And thank you to all the volunteers who help throughout the year.

Kathleen M. Massey

Natural Resource Officer
